Quick Steps for TTP Align Ruler MFA

- 1. Print this TTP Align Ruler; set printer to "fine"
- 2. Ensure bright, good light to get a fast shutter (do not use fluorescent lights as they flicker)
- 3. Set up your camera
 - a. Av aperture priority
 - b. Widest aperture lowest f/stop number for shallow depth of field
 - c. Turn on image stabilization
 - d. ISO, 800 this will get a fast shutter speed (if your pic is too grainy, drop this down)
 - e. Do not use live view, use your eye piece
 - f. Do not use a flash, you need good light for your system to operate properly
 - g. Select center focus point only *this is very important*
- 4. Mount your camera (put it on a tripod) and adjust the height for about two feet above the floor
- Tether your camera to your computer
 (This is not required but makes transfer of pictures immediate and speeds measurement)
 - Place the target flat on the floor about four to five feet in front of your camera
- 7. Level the camera and align the target square in view
- 8. Aim the center focus point to the middle focus line
- 9. Choose a mid-zoom length
- 10. Defocus your lens either way
- 11. Focus once and snap picture
- 12. View photo on computer, zoom into ruler and examine for focus accuracy
- 13. Adjust MFA in camera by three or four increments
- 14. Reshoot and adjust by two or three increments
- 15. Repeat and take average accurate setting
- 16. Done

6.

17. Drink Pilsner Urquell beer
